Individual assignment -Part 1

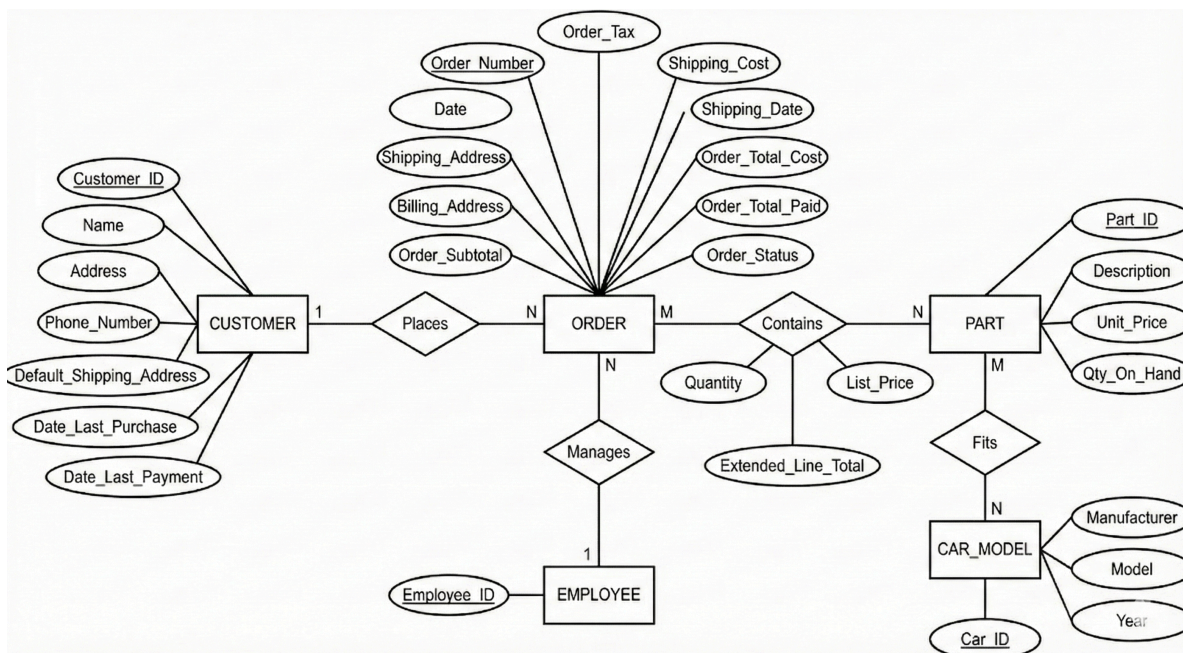

YUE CHENGHAO

227154

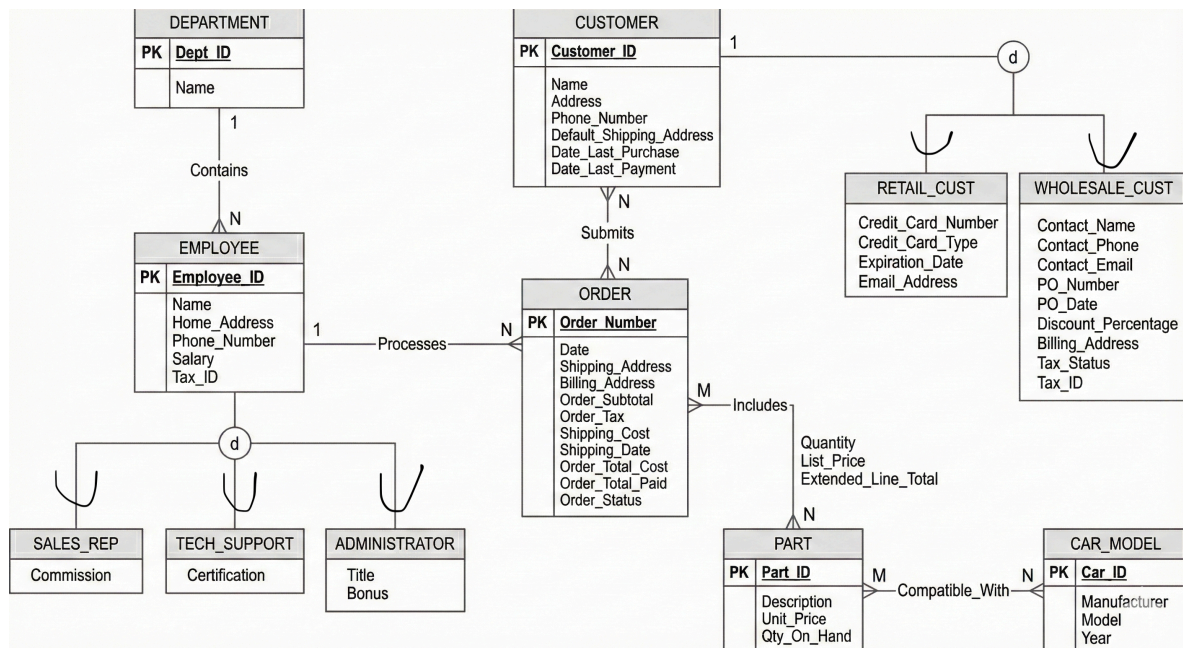

Note on Diagram Notation: Due to the extensive number of attributes and the complexity of the system, I opted to use a compact diagramming style (placing attributes within entity boxes) rather than the traditional notation with external ellipses and lines. Using the traditional method would have resulted in an overly cluttered and complex diagram. This streamlined format, created in Draw.io, was chosen to maximize readability and ensure the logical relationships are clearly presented.

part1

1.Draw ERD

2.Draw EERD

3. Draw relational model
